

Факультет Информационных технологий Кафедра Информатики и информационных технологий

направление подготовки 09.03.02 «Информационные системы и технологии»

ЛАБОРАТОРНАЯ РАБОТА № 2

Дисциплина: «Распознавание образов в информационных и автоматизированных системах копия 1»

Тема: «Работа с цветами»

Выполнил: студент группы 211-723

Сергеев Станислав Олегович

2022

Работа с цветами.

Цель:

Целью данной работы является изучение базовых операций над цветовыми каналами изображений и реализация некоторых фильтров на их основе.

Постановка задачи:

Необходимо разработать приложение Windows Forms, способное осуществлять:

- 1. загрузку и отображение двух изображений по выбору пользователя;
- 2. возможность применения базовых операций к загруженным изображениям;
- 3. возможность применения оконных и комбинированных фильтров к загруженным изображениям.
